

"It's great for the owner, and for the crew,... really easy to use..."

Yachtspot v5 was designed with both the end user, and the professional installer in mind. We've simplified the user interface for the end user, and hidden away the administration pages. ...and for the installer we've included just about every option you will ever need, and real support when you need it.

Once in a while a product arrives that redefines its market!

Announcing the new Yachtspot v5 – the most advanced, feature rich WiFi router specifically designed for the marine industry.

Yachtspot Marine WiFi, is the preferred choice of many of the world's top superyacht yards and installers. Created for the professional installer, Yachtspot v5 comes with every option they will ever need, and real support when they need it. It's great for the owner, and the crew too. Really simple to use, plus the luxury of knowing it's manufactured from high quality, tough, seaworthy, professional hardware, that's designed to ensure your boat's network logs on, and stays on.

The ONLY professional wireless router for the marine market that encrypts your internet traffic! * (subject to annual subscription). Using open WiFi has always carried the risk that your Internet activities can be listened to. It's a complex subject, but what is sure is that by routing your traffic over a VPN those risks are eliminated. Yachtspot v5 with SafeSurf VPN™ will fully encrypt all your traffic to our secure VPN servers.

IF YOU DON'T WANT YOUR INTERNET TRAFFIC READ BY STRANGERS THEN USE A SAFESURF VPN TUNNEL WITH YACHTSPOT v5
 IF YOU DON'T WANT %&*JTYE%&F* _&\$F^*(&^%F^*+@&\$F'^^* THEN USE A SAFESURF VPN TUNNEL WITH YACHTSPOT v5

“Yachtspot has gained the reputation for being the simplest to use, and most reliable WiFi solution for the leisure marine market.”
